The screenshot shows a software application window titled "KDiscoverer". On the left, there is a vertical toolbar with icons for back, forward, search, and other functions. The main area displays the "Acme Pharmaceuticals" logo. Below the logo, the word "KDiscoverer" is written vertically. A large rectangular input field covers most of the center of the screen. Inside this field, there are two text input boxes labeled "User Name:" and "Password:", both containing placeholder text. To the right of these boxes is a checkmark box labeled "Remember my user name and password". At the bottom of the input field are two buttons: "Login" and "New User". A callout arrow labeled "700" points to the top right corner of the input field. Callout arrows labeled "702" and "704" point to the "User Name:" and "Password:" fields respectively. Callout arrow "706" points to the "Login" button. A note at the bottom right of the input field reads: "If you forget your password, please call 1-800-PASSWRD".

Other Brand Name: THSC Captopril
 Generic Name: Captopril [Oral]

Pronunciation: KAP-toh-pril
 Drug class: Antihypertensive
 [Angiotensin-Converting Enzyme (ACE) Inhibitors]

Generic available? Yes
 Controlled substance? No

Oral captopril belongs to a class of blood pressure lowering agents called angiotensin converting enzyme inhibitors. It is used alone or in combination with other drugs to treat several disorders, including high blood pressure, congestive heart failure and diabetic nephropathy. It can also improve the chances of survival in some heart attack patients. Captopril works by preventing the formation of angiotensin II, a potent vasoconstrictor, and by inhibiting the secretion of aldosterone, a hormone

United States Patent

Smith

Treatment of renal diseases with ace inhibitors

Patent Number : 5,238,924
Exp. Date : A
Assignee : Microsoft Corporation

Abstract

There is disclosed the use of angiotensin converting enzyme (ACE) inhibitors to alter the progression of renal diseases by affecting intraglomerular hemodynamics and proteinuria; i.e., affecting blood pressure within the functioning, filtering tissue of the kidney and the quantity of albumin in the urine.
